say when

practice lines of enquiry things are dispersed but not left behind linear narratives conceal truth

troubling the notion of natural time / here and there in time and out of time the rise and fall of time tomorrow yet not come

the notion of natural time dispersed but not linear narrative we're never going to get there

what is the value of time as we reflect and make judgements and find our sense of being where do I want to be anyway? different perceptions of success mid-point between what? and what? how are we ever to move forward again
